RAVEN®

INTERPRETATION GUIDANCE SOFTWARE

Nevermore
do you have to waste time searching allergen databases!

KEY FEATURES

- Covers the most prevalent allergen sources and their respective molecular allergens
- Developed together with clinical allergologists & researchers
- Comments per allergen source include a short description of symptoms, specific information on molecular allergens and therapeutic suggestions (optional)
- Information on cross-reactive allergen families is also included
- RAVEN is designed to save time by avoiding the need for extensive allergen database searches
- Integrated with RAPTOR SERVER and RAPTOR DESKTOP versions
- GDPR compliant
